PRAJWALAN 2K24 - Event Website Documentation

1. Introduction

PRAJWALAN 2K24 is a dedicated event website designed to provide comprehensive details about the annual technical fest. This documentation covers the project's structure, functionality, installation steps, and deployment guidelines.

2. Project Overview

The website serves as an information hub for event participants, displaying event schedules, registration options, and contact details. The site is developed using **HTML, CSS, and JavaScript** to ensure a seamless user experience.

3. Features

- **Home Page**: Introduction and event highlights.

- **About Section**: Detailed background and purpose of the event.

- **Event Schedule**: List of event categories, date-wise breakdown.

- **Contact Form**: Allows users to reach out to event organizers.

- **Responsive Design**: Optimized for desktops, tablets, and mobile devices.

4. Technologies Used

- **HTML**: Page structure.

- **CSS**: Styling and responsive layout.

- **JavaScript**: Interactivity and form validation.

5. Project Setup

Local Installation

1. Clone the repository:

2. git clone https://github.com/mounikapatharlapalli/Prajwalan2024.git

3. Navigate to the project folder:

4. cd Prajwalan2024

5. Open index.html in a browser to preview the website.

7. Contribution Guidelines

1. **Fork the repository** to your GitHub account.

2. **Create a new branch** for feature development:

3. git checkout -b feature-name

4. **Commit your changes** with clear messages:

5. git commit -m "Added new feature"

6. **Push changes** to the repository:

7. git push origin feature-name

8. **Create a Pull Request (PR)** to merge your changes.

8. Contact Information
